Dear Sirs,

St Luke's Church, Crosby, Liverpool

I would like to thank the staff at Warmworld for their help with our recent purchase of a 2 zone controller. The technical help I have received has been wonderful - great to be able to talk to Gary direct and who returns your calls - something we don't see very often with businesses these days!

Our church has been running the 2 zone system for the last fortnight and it's wonderful that the congregation actually feel warm - something we don't hear very often from parish churches! The software we bought with the system allows us to monitor our usage of gas more effectively and see how close the actual church temperature is kept to the setpoint.

I am the Environmental Officer for the Liverpool Diocese and will be recommending this product to our churches who are looking at controlling their heating more efficiently

Regards
Paul Beardwood
